Vidar Grönros

Technical Game Designer | Game Designer

Stockholm, Sweden • v-ros@live.se • +46 70 773 88 07 • vidargronros.github.io • linkedin.com/in/vidar-grönros-39661b161

PROFILE

Technical Game Designer with nearly 4 years at **The Gang**. Currently **Lead Game Designer & Technical Designer** on an unannounced **Unreal Engine 5** incremental game, after taking ***Major League Curveball*** (UE5 / Steam) from prototype to finished game as **Lead Game Designer & Technical Designer**, designing gameplay and levels on ***Moove*** (UE5 / Steam), and shipping **Roblox** titles as **Lead Game Designer** for **Amazon** and **Samsung**. Works daily in **UE5 Blueprints**, **GAS**, **C++**, and **AI-assisted workflows**.

EXPERIENCE

The Gang · Stockholm, Sweden

Technical Game Designer — The Gang Studio — **Feb 2025 – Present**

- **Unannounced Incremental Game (UE5, In Development): Lead Game Designer & Technical Designer**—designing core loops, progression, and economy rules while implementing gameplay and ability systems in **UE5 Blueprints**, **GAS**, and hybrid **C++**.
- ***Moove* (UE5 / Steam): Game, Technical & Level Designer**—designed and implemented items and environmental hazards, tuned movement and game feel, and designed the world from initial blockout to finished level.
- **AI Workflows:** Using **AI agents** and LLM workflows for rapid prototyping, balancing tools, and documentation.

Game Designer — The Gang Studio, R&D & Brands — **Mar 2023 – Feb 2025**

- ***Major League Curveball* (UE5 / Steam): Lead Game Designer & Technical Designer**—took the project from initial prototype to finished game, leading game design and implementing fast-paced multiplayer PvP combat and ball-deflection mechanics.
- **R&D Prototyping:** Built playable prototypes for internal studio pitches to test core mechanics and game feel.
- **Shipped Brand Games (Roblox Studio / Luau): Lead Game Designer** on ***Amazon's Holiday Dash*** (sled-racing & minigames; 30.8M votes, 778K claimed UGCs) and ***Samsung Space Tycoon* × *Space Cup*** (sports arena & PvP minigames).

Game Design Intern (LIA) — The Gang Brands — **Autumn 2022 – Mar 2023**

Unreal Engine Blueprints Workshop Instructor — NTI Gymnasiet, Stockholm — **2022**

Taught a hands-on workshop introducing high school students to Unreal Engine Blueprints and game development.

SKILLS

Engines & Code	Unreal Engine 5 (Blueprints, Gameplay Ability System / GAS), C++ (Hybrid BP/C++ & Debugging), Roblox Studio (Luau), Unity (C#)
Game Design	Technical Design, Systems & Progression, Multiplayer PvP & Combat Feel, Rapid Prototyping, UX/UI
AI & Workflows	AI Agents & LLM Workflows, Agile / Scrum, MDA Framework
Tools	Perforce (P4V), Git, SVN, Jira, HacknPlan, Trello, Machinations, Miro, Figma
Languages	Swedish (Native), English (Fluent)

AWARDS & SHOWCASES

***ReLeap* — Official Selection at alt.ctrl.GDC & Diversity Award at Gotland Game Conference** — **2019**

2D rooftop runner with a custom arcade cabinet (pull-back handlebar to charge jumps, foot-slider to slide). Built the physical controller hardware and programmed the **Unity (C#)** integration; showcased at **GDC** San Francisco.

EDUCATION

Futuregames — Game Design — **2021 – 2023**

Stockholm · Higher Vocational Diploma · 3 team game projects (Unreal Engine & Unity)

Uppsala University (Campus Gotland) — Game Design & Project Management (Coursework) — **2017 – 2020**

Visby · Completed 3 years of Bachelor's coursework (no diploma) · 2 team game projects (including *ReLeap*)
